1. Introduction

1.1 About Equimon

Equimon is the official Laboratory Inventory & Borrowing Management System developed for Institut Teknologi Sepuluh Nopember (ITS). It is a web-based platform that centralizes every step of equipment lending — from inventory tracking to borrowing requests, multi-level approvals, pickup, return and condition reporting.

This manual is written for everyone who uses the system, regardless of role. Each chapter is self-contained: you can read only the section that applies to you or read straight through for a complete picture of how the platform works.

1.2 What the system does

- Maintains a single, real-time catalogue of all laboratory equipment, including quantity, condition and photos.
- Lets students browse the catalogue and submit borrowing requests online.
- Enforces a structured, multi-level approval workflow: Lecturer review, followed by Head of Lab final approval.
- Provides lab assistants with tools to prepare equipment for pickup, hand it over, and record its return condition.
- Gives administrators full oversight: user management, inventory, reports, audit logs and system settings.
- Records every significant action in an audit log for full traceability and accountability.

1.3 Who should read this manual

Audience	What you'll find here
Students	How to browse the catalogue, submit borrowing requests, track their status, and request extensions.
Lecturers	How to review requests assigned to you and forward or reject them with remarks.
Heads of Laboratory	How to issue final approvals and oversee all forwarded requests.
Lab Assistants	How to prepare equipment, release it to borrowers, and process returns and extensions.
Administrators	How to manage users, inventory, reports, audit logs and system-wide settings.

1.4 How to use this manual

Section 2 covers items everyone needs: logging in, registration and your first look at the system. Sections 3 to 7 are role-specific — jump directly to the chapter that matches your role. Sections 8 to 12 contain shared topics (profile, notifications, validation rules, status definitions and troubleshooting) that apply to every user.

Note

Throughout this manual, paths are written as Sidebar → Page Name. Buttons are written in bold (for example, **Submit Request**).

2. System Overview

2.1 User roles

The system has five roles, each with distinct responsibilities and permissions. Every account in Equimon is assigned exactly one role.

Role	Key responsibilities
Student	Browse the catalogue, submit and track borrow requests, request extensions on active loans.
Lecturer	First-level review — verify that requests are tied to academic activity, then forward to the Head of Lab or reject.
Head of Lab	Final approval authority — approve or reject requests that have been forwarded by a lecturer.
Lab Assistant	Prepare and release equipment, process returns, record condition, and handle extension requests.
Admin	Full system access — user management, inventory, reports, audit logs and system settings.

2.2 The borrowing lifecycle

Every borrowing request follows the same lifecycle. Each stage requires a manual action from a specific person before the request can move forward.

```

Student submits request
  |
  v
[Pending Lecturer] --reject--> [Rejected]
  |
  forward
  v
[Pending Head]    --reject--> [Rejected]
  |
  approve
  v
[Head Approved]   (Lab Assistant prepares equipment)
  |
  v
[Ready for Pickup] (Lab Assistant releases to student)
  |
  v
[Borrowed]        (Student may request extension)

```

|
v
[Returned] (Lab Assistant records condition)

Rejection is possible at either the Lecturer or Head of Lab stage. When this happens, the student is notified immediately with the rejection reason, and the request is moved to the Rejected status.

2.3 Key concepts

Catalogue — the list of all published equipment available to students. Items can be unpublished by an admin to hide them from the catalogue without deleting them.

Request status — a label that shows where a request is in its lifecycle. See Chapter 11 for the full status reference.

Approval chain — Lecturer reviews first, then the Head of Lab decides. Both must approve before the lab assistant can prepare equipment.

Extension — students can request additional time on an active loan. The lab assistant approves or rejects the extension.

3. Getting Started

3.1 Logging in — students

1. Open the system URL in your browser (10.4.89.165).
2. On the landing page, click “Sign In Now”.

3. Enter your ITS student email (yourname@student.its.ac.id) and your password.
4. Tick Remember me if you want to remain signed in after closing the browser.
5. Click Sign In.

Common problems

- Your email must end in @student.its.ac.id — other addresses are not accepted.
- Your account must be active — contact your admin if you cannot log in.
- Email and password must match exactly. For security, the system does not indicate which of the two is wrong.

3.2 Logging in — Staff

This section applies to Lecturers, Heads of Lab, Lab Assistants and Admins.

1. Navigate to the Staff Login page (/admin-login) or press **Ctrl + Alt + Shift + L** anywhere in the system.
2. Enter your ITS staff email (yourname@its.ac.id) and password.
3. Click Sign In.

Common problems

- Your email must end in @its.ac.id.
- Student accounts cannot access the staff login page — use the main login page instead.
- Your account must be active.

3.3 Self-registration — students only

Students may register their own account from the login page. Staff accounts are created only by an administrator.

1. On the login page, click Register or Create Account.
2. Fill in the registration form using the rules in the table below.

The screenshot shows a dark-themed user interface. On the left is a blurred 'Welcome to Equimon' login screen. On the right is a 'Sign up' form. The form has a 'Back' link at the top left and a close 'X' button at the top right. Below the title, it says 'Welcome back! Please sign in to continue.' The form fields are: LAST NAME (with a hint 'Enter your last name'), FIRST NAME (with a hint 'Enter your first name'), MIDDLE NAME (OPTIONAL) (with a hint 'Enter your middle name'), STUDENT ID (with a hint 'Enter your student ID number'), DEPARTMENT (with a hint 'e.g. Informatics Engineering'), EMAIL ADDRESS (with a hint 'Enter your email address' and a note 'Must end with @student.its.ac.id'), PASSWORD (with a hint 'Enter your password' and an eye icon), and CONFIRM PASSWORD (with a hint 'Re-enter your password'). At the bottom are two buttons: 'Create Account' (highlighted in blue) and 'Back to Sign In'.

Field	Required	Notes
Full Name	Yes	Letters only — no numbers and symbols
Email	Yes	Must end in @student.its.ac.id
Student ID	Yes	Numbers only — no letters or symbols
Department	Yes	Select from the list
Password	Yes	See the password policy in Section 10.1
Confirm Password	Yes	Password confirmation

3. Click Register.

On success, you are automatically signed in and taken to your dashboard.

Note

Staff accounts (Lecturer, Head of Lab, Lab Assistant, Admin) are created by an Admin. Self-registration is not available for staff roles.

3.4 After Login

After signing in, you are taken to your role-specific Dashboard.

Students — use the navbar at the top to navigate between pages. The top bar also gives you access to the notifications bell, the language switcher (EN / ID), and your account menu (Settings, Profile, Notification, and Sign Out).

Lecturers, Heads of Laboratory, Lab Assistants and Admins — use the sidebar on the left to navigate between pages. The top bar gives you access to the notifications bell, the language switcher (EN / ID), and real-time date and timecard.

On mobile — tap the burger icon on the right to open the navigation menu. The top bar still gives you access to the notifications bell and your account menu (Profile and Sign Out).

Important

If the system is in Maintenance Mode, you will see a maintenance page and cannot use the system until the Admin disables it.

4. Student Guide

4.1 Your Dashboard

Your dashboard shows a live summary of your activity:

- Pending — requests waiting for lecturer or head approval.
- Borrowed — equipment you currently have.
- Rejected — requests that were declined.
- Returned — equipment you have returned.

4.2 Browsing the equipment catalogue

Path: Navbar → Catalog

The catalogue shows all available equipment as cards. Each card displays the equipment name and photo, its category, the available quantity, and its current condition.

Categories include: Electronics, Computing, Networking, Peripherals, Storage, Cables, Tools and Other. Conditions are: Excellent, Good, Fair and Poor.

Use the search bar to filter by name. Click any card to view full details; description, serial number, total versus available quantity, and all photos.

Note

Equipment with zero available units is still shown but cannot be borrowed until the stock is restored.

4.3 Submitting a borrow request

Path: Catalog → select an item → Borrow

Steps

1. Find the equipment in the catalogue and click its card.
2. Click Borrow in the detail view.
3. Fill in the request form using the rules in the table below.

Field	Required	Rule
Quantity	Yes	At least 1 — cannot exceed available stock
Borrow Date	Yes	Cannot be in the past
Return Date	Yes	Must be on or after the Borrow Date
Purpose	Yes	Cannot be empty
Objective	No	Optional
Lecturer	No	Select from the dropdown list of active lecturers

- Read the Replacement Policy and tick the agreement checkbox — the form cannot be submitted without it.

The screenshot displays the Equimon Laboratory Management System interface. The main header includes the ITS logo, 'TEKNOLOGI INFORMASI', and 'Equimon Laboratory Management System'. Navigation links for 'Dashboard', 'Equipment Catalog', and 'My Requests' are visible. The 'Equipment Catalog' page shows a search bar and two equipment cards: 'Category 6 (Cat6) Cable' and 'Webcam'. The 'Category 6 (Cat6) Cable' card shows a total of 20 and available of 20, with a location of LAB 984 and 100% availability. The 'Webcam' card shows a total of 10 and available of 10, with a location of LAB 984 and 100% availability. An 'EQUIPMENT REQUEST' modal is open for 'Category 6 (Cat6) Cable'. The modal includes fields for 'QUANTITY' (set to 10), 'BORROW DATE' (05/21/2026), 'RETURN DATE' (05/28/2026), 'OBJECTIVE / PURPOSE' (For networking purposes), 'APPROVING LECTURER' (Dr. Siti Aminah), and a 'Policy' checkbox (checked). The modal also shows 'TOTAL' and 'AVAILABLE' counts (2 and 2) and a 'Duration: 7 days' indicator. The 'Review & Submit' button is highlighted in blue.

- After clicking Review and Submit Request, it will redirect to the Preview Request modal whereas it will show the student information, borrow and return date, assigned lecturer, objective/purpose, and official loan receipt in a PDF format, with a print button.

Your request immediately moves to Pending Lecturer status and your selected lecturer is notified.

Common errors

- "Borrow date cannot be in the past" — select today or a future date.
- "Return date cannot be before borrow date" — the return date must equal or follow the borrow date.
- "You must agree to the replacement policy" — tick the checkbox.
- "Quantity must be at least 1" — enter a whole number of 1 or more.
- "Purpose is required" — do not leave the purpose field blank.

4.4 Tracking your requests

Path: Navbar → My Requests

The page has two tabs:

Active — requests still in progress (not yet returned or rejected). Each card shows the equipment name and image, the borrow and return date range, the current status badge, and a progress bar showing the current stage.

All History — your complete request history. Use the filter chips to view by status: All, Pending, Approved, Borrowed, Returned, Rejected.

Click a card to open the Request Detail, which shows a six-step visual tracker (Submitted → Lecturer Approved → Head Approved → Ready for Pickup → In Use → Returned), the assigned lecturer's name, any rejection reason, and extension details if applicable.

4.5 Requesting a return date extension

You can request more time with the equipment while your request is in the Borrowed status.

Steps

1. Go to My Requests → Active tab.
2. Find the request with Borrowed status.
3. Click Request Extension on the card or inside the detail view.
4. Fill in the extension form using the rules in the table below.

Field	Required	Rule
New Return Date	Yes	Must be on or after the original return date
Reason	No	Optional

5. Click Submit.

The lab assistant is notified. You will receive a notification when the extension is approved or rejected. If approved, your return date updates automatically.

Restrictions

- Only one pending extension is allowed per request at a time.
- Extensions can only be requested while the status is Borrowed.

5. Lecturer Guide

5.1 Your dashboard

Your dashboard shows the requests assigned to you that are awaiting your action, along with a summary of your recent decisions.

5.2 Reviewing pending approvals

Path: Sidebar → Pending Approvals

Lists every request assigned to you with Pending Lecturer status. Each card displays the equipment name, category and photo; the borrower's name, email and department; the borrow period and duration in days; and the submission date.

Urgent badge — shown automatically when the borrow date is within 3 days, or the request has been waiting more than 3 days.

Option A — full review, then decide

1. Click Review & Decide on a card.
2. The detail view opens with all request information and a Lecturer Remarks text field.
3. Optionally add a remark for the Head of Lab.
4. Choose View Loan Slip to preview the printable loan document, Forward to send to the Head of Lab, or Reject to decline.

Option B — quick action from the list

Use the buttons on the card directly:

- Forward — forward immediately.
- Reject — reject immediately.

Both buttons open a short confirmation dialog where you can add an optional note.

Forwarding a request

1. Click Forward.
2. Optionally add a remark for the Head of Lab.

3. Click Confirm.

Rejecting a request

1. Click Reject.
2. Optionally add a rejection reason

3. Click Confirm.

The request moves to Rejected status and the student is notified immediately.

5.3 Printing

- Print Details — print the loan slip for a single request.
- Print Queue — print all requests currently visible on the page as a batch report.

5.4 Approval history

Path: Sidebar → Approval History

Shows every request you have previously forwarded or rejected, along with the decision, timestamp and any remarks you added.

5.5 Equipment catalog (read-only)

Path: Sidebar → Inventory

A read-only view of all published equipment with real-time availability and condition. For reference only — no borrow actions are available from this view.

6. Head of Laboratory Guide

6.1 Your dashboard

Your dashboard shows the requests forwarded by lecturers that are awaiting your final decision, plus a summary of your recent decisions.

6.2 Reviewing final approvals

Path: Sidebar → Final Approvals

Lists every request with Pending Head status. Each card shows the same information as the lecturer view, plus the lecturer's remarks when forwarding and the name of the forwarding lecturer.

Option A — full review, then decide

1. Click Review & Decide (Approve or Decline).
2. Review all request details, including the lecturer's remarks.
3. Optionally add a note for the lab assistant.

Option B — quick action from the list

Use the Approve or Reject buttons directly on the card. Both open a brief confirmation dialog.

Approving a request

1. Click Approve.

2. Optionally add a note for the lab assistant.
3. Click Confirm.

The request moves to Head Approved status. The lab assistant is notified to prepare the equipment, and the student is notified that their request has been approved.

Rejecting a request

1. Click Reject.
2. Optionally add a rejection reason.

3. Click Confirm.

6.3 Approval History

Path: Sidebar → Approval History

Shows every request you have previously approved or rejected, with your decision, timestamp and notes.

6.4 Equipment Catalog (read-only)

Path: Sidebar → Inventory

A read-only view of all published equipment with real-time availability and condition.

7. Lab Assistant Guide

7.1 Your dashboard

Your dashboard surfaces the work that needs your attention:

- Ready to Prepare — requests approved by the Head of Lab waiting for your action.
- Currently Borrowed — equipment out with borrowers.
- Ready for Pickup — active loans out.
- Pending Return — awaiting returns.

7.2 Viewing all borrow requests

Path: Sidebar → All requests

- Pending tab — requests that need your action (Head Approved or Ready for Pickup).
- All tab — every request in the system regardless of status.

The screenshot displays the 'All Requests' page in the Equimon system. The sidebar on the left contains navigation links under three categories: APPLICATION (Dashboard), OPERATIONS (Equipment Preparation, Returns, Problem Returns, All Requests), and SYSTEM (Settings). The 'All Requests' link is highlighted. The top header shows the date 'Thu, May 21' and time '10:15:10 PM'. The main content area has a title 'All Requests' with a subtitle 'Complete history of all equipment borrow requests' and a '2 TOTAL' count. Below this is a summary bar showing counts for different statuses: ALL (2), PENDING (1), APPROVED (1), RETURNED (0), and REJECTED (0). A search bar and a 'PRINT REPORT' button are also present. The main table lists two requests:

EQUIPMENT	BORROWER	PERIOD	STATUS	CREATED	ACTIONS
Webcam Qty: 2	Test User testuser@student.its.ac.id	May 21, 2026 → May 28, 2026	PENDING HEAD	Thu, May 21 21:37	REVIEW
Category 6 (Cat6) Cable Qty: 10	Test User testuser@student.its.ac.id	May 21, 2026 → May 28, 2026	BORROWED	Thu, May 21 21:12	REVIEW

At the bottom of the sidebar, the user profile for Budi Santoso (Lab Assistant) is shown, along with a Logout button.

7.3 Preparing Equipment

When a Head of Lab approves a request, it appears in your Pending tab with Head Approved status.

Steps

1. Go to Borrow Requests → Pending tab.
2. Click the request with Head Approved status.
3. Review the equipment details and borrower information.
4. Physically locate and set aside the equipment in the lab.

The screenshot displays the 'Equipment Preparation' section of the Equimon application. The interface includes a sidebar with navigation links and a main content area. The main content area shows a summary of requests in three categories: 'ALL' (1 Total in queue), 'NEEDS PREPARATION' (1 Awaiting preparation), and 'READY FOR PICKUP' (0 Ready to collect). Below this summary is a search bar and a detailed view of a specific request for a 'Webcam x2' (REQ-2026-4F57) borrowed by 'Test User'. The request details include pickup date (May 21, 2026), pickup location (Lab E101 - Pickup Bin A), and return date (May 28, 2026). Action buttons include 'MARK AS READY', 'VIEW FORM', and 'PRINT SLIP'. The user profile at the bottom left shows 'Budi Santoso, Lab Assistant'.

5. Click “Mark as Ready”.

The status changes to Ready for Pickup and the student is notified to come collect their equipment.

7.4 Releasing equipment to the borrower

When the student arrives to collect the equipment:

1. In Borrow Requests → Pending tab, find the request with Ready for Pickup status.
2. Verify the student's identity against the request (name and student ID).
3. Click the card to open the detail view.
4. Click Release (or Mark as Borrowed).

5. Confirm.

The status changes to Borrowed and the equipment's available count is updated.

7.5 Processing returns

Path: Sidebar → Returns

Returns are grouped into sections based on urgency:

Section	Criteria
Overdue	Past the return date
Due Soon	Return date within the next 3 days
Regular	On schedule
All	All active loans

Steps: completing a return

1. Find the borrower's request in the list.
2. Click the card to open the Return Form.
3. Fill in the return details using the rules in the table below.

Field	Required	Options
Condition	Yes	Excellent / Good / Fair / Poor / Damaged / Lost
Remarks	No	General notes
Damage Details	If damaged	Describe the damage
Damage Photo	No	Upload a photo (drag and drop or click to select)
Student will replace	If damaged	Toggle to record the replacement obligation

The screenshot displays the 'Process Return' modal in the Equimon application. The modal is overlaid on the 'Equipment Returns' dashboard. The dashboard sidebar includes links for Dashboard, Equipment Preparation, Returns, Problem Returns, All Requests, and Settings. The main content area shows a list of equipment requests, with the selected item being a 'Webcam' borrowed by 'Test User' on May 21, 2026, with a due date of May 28, 2026. The modal form allows the user to specify the return condition (currently 'Good') and add optional remarks. The 'Confirm Return' button is highlighted in blue.

4. Click Confirm Return.

The status changes to Returned and the equipment's available count is restored.

7.6 Handling extension requests

Extension requests from borrowers appear on the Returns page as a notification on the relevant request card.

Approving an extension

1. Click the extension notification on the card.
2. Review the new requested return date and reason.

The screenshot displays the 'Equipment Returns' interface. On the left is a dark sidebar with navigation links: Dashboard, Equipment Preparation, Returns (selected), Problem Returns, All Requests, and Settings. The main content area has a top header with the date 'Thu, May 21' and time '10:28:35 PM'. Below this is a summary section with four cards: 'ALL' (2 items), 'OVERDUE' (0 items), 'DUE SOON' (0 items), and 'REGULAR RETURNS' (2 items). The 'Pending Extension Requests' section shows a table with one entry for a 'Webcam' borrowed by 'Test User' on 'May 28, 2026', with a 'REQUESTED NEW DATE' of 'May 30, 2026'. Below the table is a search bar and a 'PRINT QUEUE' button. At the bottom, a detailed view of the 'Webcam' item shows its ID, borrower 'Test User', and loan duration of 7 days. Action buttons include 'MARK RETURNED', 'SEND REMINDER', and 'PRINT RECEIPT'.

EQUIPMENT	BORROWER	CURRENT RETURN DATE	REQUESTED NEW DATE	ACTION
Webcam	Test User	May 28, 2026	May 30, 2026	✓ APPROVE ✗ REJECT

BORROWER	DATE BORROWED	DATE DUE BACK	LOAN DURATION
Test User	May 21, 2026	May 28, 2026	7 days

3. Click Approve, optionally add a note, and confirm.

The student's return date is updated and they are notified.

Rejecting an extension

1. Click Reject, optionally add a note explaining why, and confirm.

The student is notified and the original return date remains.

7.7 Printing

- **Print Queue** — prints the current return queue as a report.
- **Print Receipt** — prints the individual return receipt for a specific request (available after confirming a return).

8. Admin Guide

8.1 Your dashboard

System-wide overview: total registered users, total equipment items, active borrows, and pending requests across all approval stages.

8.2 User management

Path: Sidebar → User Management

Viewing and searching

The user list shows all accounts. Use:

- Search bar — filter by name or email.
- Role filter — filter by role.
- Status filter — filter by Active, Inactive or Suspended.

Results are paginated, with 10 entries per page.

Prev 1 2 Next

Creating a user

1. Click + Add User.
2. Fill in the form using the rules in the table below.

Field	Required	Rule
Full Name	Yes	At least 2 characters
Email	Yes	Must match the role's allowed domain
Role	Yes	Student / Lecturer / Lab Assistant / Head of Lab / Admin
Department	No	Select from the list
Student ID	If role = Student	Numbers only
Phone	No	—
Password	No	If left blank, a temporary default is assigned — user must change it after first login

Email domain rules:

Role	Required email domain
Student	@student.its.ac.id
Lecturer, Lab Assistant, Head of Lab, Admin	@its.ac.id

The screenshot displays the 'User Management' page with a modal window titled 'Add New User'. The modal contains the following fields and options:

- LAST NAME *** and **FIRST NAME ***: Text input fields.
- MIDDLE NAME optional**: Text input field.
- ROLE ***: A dropdown menu with 'student' selected.
- EMAIL ADDRESS ***: Text input field with a note: 'must be @student.its.ac.id'.
- PASSWORD**: Text input field with a note: 'defaults to Default123! if blank'.
- STUDENT ID optional**: Text input field.
- PHONE optional**: Text input field.
- DEPARTMENT optional**: A dropdown menu with 'Select department' selected.

At the bottom of the modal, there is a legend for asterisks (* REQUIRED), and two buttons: 'CANCEL' and 'CREATE USER'.

3. Click Create.

Common errors

- "Email domain is not allowed for this role" — the email's domain does not match the selected role.
- "User already exists" — an account with that email is already registered.

Editing a user

1. Click the Edit icon on the user's row.
2. Update the desired fields: name, department, phone, role, status, password or email.

The screenshot displays the 'Edit User' modal in the Equimon system. The modal is titled 'Edit User' and includes the subtitle 'Modify account details and permissions.' The user being edited is 'Test User' with the email 'testuser@student.its.ac.id' and role 'STUDENT'. The modal contains the following fields and options:

- FULL NAME:** Text input field containing 'Test User'.
- ROLE:** Dropdown menu currently set to 'student'.
- STATUS:** Dropdown menu currently set to 'active'.
- EMAIL:** Text input field containing 'testuser@student.its.ac.id'.
- STUDENT DETAILS:**
 - STUDENT ID:** Text input field containing '39581220'.
 - PHONE:** Text input field.
 - DEPARTMENT:** Dropdown menu currently set to 'Information Technology'.
- NEW PASSWORD:** Text input field with a note 'leave blank to keep current'.

At the bottom of the modal are two buttons: 'CANCEL' and 'SAVE CHANGES'.

3. Click Save.

Note

Only admins can change a user's role or status.

Deleting a user

1. Click the Delete icon on the user's row.

2. Confirm the deletion in the dialog.

Important

You cannot delete your own account.

8.3 Equipment inventory

Path: Sidebar → Inventory

Viewing inventory

Use the search bar to filter by name or click category chips to filter by category: All, Electronics, Computing, Networking, Peripherals, Storage, Cables, Tools, Other.

Each row shows the equipment name, category, total quantity, available quantity, condition, status and publish state.

3. Click Save.

Deleting equipment

1. Click the Delete icon on the equipment row.
2. The system checks for active borrow requests linked to this item. If active requests exist, deletion is blocked. If not, a confirmation dialog appears.

3. Confirm to delete.

Publishing and unpublishing equipment

The Published toggle controls whether the item appears in the student catalogue.

- Published — visible to students.
- Unpublished — hidden from the catalogue. Existing requests for this item are not affected.

8.4 Equipment process

Path: Sidebar → Equipment Process

A global view of all borrows requests across the system. Admins can take the same actions as the lab assistant and filter by status, equipment or student.

Equipment Process
Monitor the ongoing progress of all borrow requests system-wide

Each entry shows the event type, actor name and email, timestamp and relevant details. Click Print Audit Report to export the log as a printable document.

8.7 System settings

Path: Sidebar → Settings

The screenshot shows the 'Settings' page in the Equimon system. The left sidebar contains navigation links for Dashboard, Users, Inventory, All Requests, Equipment Process, Borrow Reports, Reports, Audit Logs, and Settings (which is highlighted). The main content area is titled 'Settings' and includes a sub-header 'SYSTEM - SETTINGS'. Below this, there are four tabs: SECURITY, SIDEBAR, MAINTENANCE, and STORAGE. The 'SECURITY' tab is active, displaying the 'Change Password' section. This section includes fields for 'CURRENT PASSWORD', 'NEW CREDENTIALS', 'NEW PASSWORD', and 'CONFIRM YOUR NEW PASSWORD'. A 'UPDATE PASSWORD' button is at the bottom. To the right, there are 'Requirements' for the new password: at least 8 characters, one uppercase letter, one lowercase letter, one number, and one special character. A note at the bottom right suggests using a passphrase.

Maintenance mode

Toggle Maintenance Mode on or off:

- On — all non-admin users see the maintenance page and cannot use the system.

The screenshot shows the 'Settings' page in the Equimon system, with the 'MAINTENANCE' tab selected. The main content area is titled 'Maintenance Mode' and includes a sub-header 'Control system access for students and non-admin users'. Below this, there is a 'SYSTEM STATUS' section showing 'SYSTEM OPERATIONAL'. A red button labeled 'ENABLE MAINTENANCE MODE' is visible. To the right, there is a 'What Happens' section with a list of actions: Students are redirected to the maintenance page, API calls return 503 for non-admins, Admin accounts can still log in and work normally, and Status persists in the database across restarts. A note at the bottom right suggests using maintenance mode when performing system updates or critical data changes.

Important

Enable maintenance mode before performing system updates or database maintenance. This action is recorded in the audit log.

9. Profile & Settings

9.1 Your profile

Path: Top navigation → your name or avatar → Profile, or Sidebar → Profile

Shows your display name, email, role, department, student ID (if applicable), phone number and account creation date.

The screenshot displays the 'Profile Settings' page in the Equimon Laboratory Management System. The page is divided into three main sections: Account Details, Change Password, and Requirements.

Account Details: This section shows the user's profile information. It includes a blue square avatar with the letters 'TU'. Below the avatar, the name 'Test User' is displayed, followed by the email 'testuser@student.lits.ac.id' and the role 'Student'. Further down, the 'STUDENT ID' is listed as '39581228', the 'DEPARTMENT' is 'Information Technology', and the 'JOINED' date is indicated by a minus sign.

Change Password: This section is titled 'Change Password' with a subtitle 'Keep your account secure with a strong password'. It features a three-step process: '1 Verify Identity', '2 New Password', and '3 Confirm'. The 'Current Password' field is currently empty, with a placeholder text 'Enter your current password'. A 'Verify and continue' button is located at the bottom of this section.

Requirements: This section is titled 'Requirements' with a subtitle 'Must meet all 4'. It lists four requirements, each with a radio button: 'At least 6 characters', 'One uppercase letter', 'One lowercase letter', and 'One number'. Below this, there is a 'Strength Progress' section with a progress bar and the text 'Enter a password'.

The top navigation bar includes links to 'Dashboard', 'Equipment Catalog', and 'My Requests'. The user's name 'Test' is visible in the top right corner.

9.2 Changing your password

Path: Profile page or Settings → Change Password

1. Enter your Current Password.
2. Enter your New Password.
3. Enter Confirm New Password — must match exactly.

The screenshot shows the 'Profile Settings' page in the Equimon system. The page has a dark theme. On the left, there's a sidebar with 'ACCOUNT PROFILE' and 'Profile Settings'. The main content area is titled 'Change Password' with a subtitle 'Keep your account secure with a strong password'. It features three progress steps: 'Verify Identity' (completed), 'New Password' (active), and 'Confirm' (pending). The 'Current Password' field is filled with 'Current password confirmed'. The 'New Password' field is filled with dots. The 'Confirm your new password' field is also filled with dots. A green checkmark indicates 'Passwords match'. A blue 'Update Password' button is at the bottom. On the right, there's a 'Requirements' section with a checklist: 'At least 6 characters', 'One uppercase letter', 'One lowercase letter', and 'One number'. Below that is a 'Strength Progress' bar showing '4/4 - Strong'.

4. Click Change Password.

Validation

- Current password must be correct.
- New password cannot be the same as your current password.
- New password must meet the password policy in Section 10.1.

9.3 Settings

Path: Navbar → Settings

Setting	Description
Language	Switch the interface language
Theme	Set dark or light mode

Additional settings may be visible depending on your role.

10. Notifications

10.1 Viewing notifications

Click the bell icon in the top bar to open the notification panel. Unread notifications show a badge count.

Path: Sidebar → Notifications — full page view with timestamps and the option to mark all as read.

10.2 What triggers a notification

Role	Notified when
Student	Request forwarded to Head of Lab, request approved, request rejected, equipment ready for pickup, extension approved, extension rejected
Lecturer	A new borrow request is assigned to you
Head of Lab	A request is forwarded for your final decision
Lab Assistant	Equipment is approved and ready to prepare; a student submits an extension request
Admin	System-level events

The screenshot displays the Equimon Notifications interface. At the top, there's a header with the Equimon logo and navigation links. Below the header, the 'Notifications' section is active, showing a summary of 12 total notifications, with 12 unread. The notifications are listed in a table-like format with icons, text, and timestamps. The notifications are as follows:

Icon	Notification Text	Timestamp
🔔	Webcam has been marked as borrowed	31m ago
🔔	Webcam has been marked as borrowed	31m ago
🔔	Webcam is ready for pickup	32m ago
🔔	Webcam approved by head of lab	38m ago
🔔	Webcam approved by lecturer and waiting head approval	53m ago
🔔	Request submitted for Webcam	1h ago

11. Validation Reference

11.1 Password policy

All passwords must meet the following rules:

Rule	Requirement
Minimum length	8 characters
Uppercase letter	At least 1 (A–Z)
Lowercase letter	At least 1 (a–z)
Number	At least 1 (0–9)
Special character	At least 1 (e.g. ! @ # \$ %)

Example of a valid password: LabSystem2024!

When an Admin creates a user without entering a password, a temporary default is assigned. The user must change it after their first login.

11.2 Email domain rules

Role	Required email domain
Student	@student.its.ac.id
Lecturer, Lab Assistant, Head of Lab, Admin	@its.ac.id

11.3 Borrow request rules

Field	Rule
Quantity	Whole number, minimum 1
Borrow Date	Cannot be in the past
Return Date	Must be on or after the Borrow Date
Purpose	Required — cannot be empty
Replacement Policy	Agreement checkbox must be checked

11.4 Other field rules

Context	Field	Rule
Profile / user creation	Name	2–100 characters
Student registration	Student ID	Numbers only — no letters or symbols
Equipment form	Name, Category, Location	Required — cannot be empty
Equipment form	Quantities	Whole numbers, 0 or more

12. Request Status Reference

Each request moves through a defined sequence of statuses. This table is the quick reference for what each status means and who acts next.

Status	Meaning	Who acts next
Pending Lecturer	Awaiting the lecturer's first review	Lecturer
Pending Head	Lecturer forwarded; awaiting final decision	Head of Lab
Head Approved	Final approval granted; equipment being prepared	Lab Assistant
Ready for Pickup	Equipment prepared; student may collect	Student / Lab Assistant
Borrowed	Equipment with the borrower	Lab Assistant (return)
Returned	Equipment returned and condition recorded	—
Rejected	Declined at the Lecturer or Head of Lab stage	—

13. Troubleshooting

13.1 Cannot sign in — student login page

- Email must end in @student.its.ac.id. Staff must use the staff login page.
- Check that Caps Lock is off.
- Your account may be inactive — contact your admin.
- If you have no account yet, click Register on the login page.

13.2 Cannot sign in — staff login page

- Email must end in @its.ac.id.
- Student accounts cannot access the staff login page — use the main login page instead.
- Check that Caps Lock is off and your password is correct.
- Your account may be inactive — contact your admin.

13.3 Request is stuck and not progressing

Each status change requires a manual action from the appropriate person:

- Pending Lecturer — the assigned Lecturer must forward or reject it.
- Pending Head — the Head of Lab must approve or reject it.
- Head Approved — the Lab Assistant must mark it as prepared.
- Ready for Pickup — the Lab Assistant must release it when you arrive.
- Borrowed — the Lab Assistant must process the return when you bring the equipment back.

Check your Notifications — there may be a rejection reason or a pending action. Contact the relevant person if a step has been waiting unusually long.

13.4 Equipment is not showing in the catalogue

- The item may be unpublished — the Admin can make it visible from the Inventory page.
- The item may have zero available units — it appears but cannot be borrowed.
- Contact your Admin to check the item's status.

13.5 Cannot submit a borrow request

See the error message shown on the form:

- "Borrow date cannot be in the past" — select today or a future date.
- "Return date cannot be before borrow date" — the return date must equal or follow the borrow date.

- "You must agree to the replacement policy" — tick the checkbox.
- "Quantity must be at least 1" — enter a whole number of 1 or more.
- "Purpose is required" — fill in the purpose field.

13.6 Cannot request an extension

- Extensions are only available while the status is Borrowed.
- If you already have a pending extension for this request, wait for it to be approved or rejected before submitting another.

13.7 Cannot delete equipment (Admin)

If the system blocks the deletion, the equipment has active borrow requests still in progress. Resolve or wait for those requests to be returned or rejected, then retry.

13.8 Notifications are not updating

Notifications are delivered in real time. If the count seems stale, refresh the page to reconnect.

13.9 Page shows "Maintenance Mode"

The system has been placed under maintenance by an administrator. Wait for the maintenance window to end, then reload the page.

13.10 Password change fails

- "Current password is incorrect" — re-enter your current password carefully.
- "New password must be different from current password" — choose a password you haven't used.
- Policy error — ensure your new password has at least 8 characters, 1 uppercase, 1 lowercase, 1 number, and 1 special character.

*For access issues or technical support, contact your system administrator
or the ITS Smart City & Cybersecurity Lab team.*
